\* Reclassification of €0.3bn of savings from Private Banking to Other as per 1/1/2020. The comparative figures have been adjusted accordingly

# Omni-channel service model available for our clients in Belgium

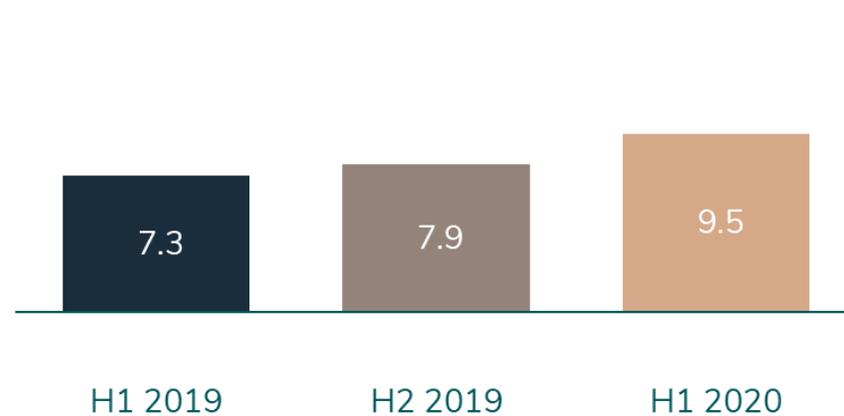

- We have successfully completed our work on phasing out our Belgian IT infrastructure. Private Banking clients and employees were successfully migrated to the group structure

- Positive result on FX trading of €4.6m

# Result on structured products impacted by exceptional volatility and illiquidity

## Structured products

- Structured products involve using company-issued debt with embedded derivatives linked to equity indices
- The structured products cater to the need of our Private Banking clients, offering an alternative instrument to diversify their portfolios to align risk and return in line with their wishes
- We apply macro hedging with respect to these positions and these hedges are effective under most market conditions

## Results H1 2020

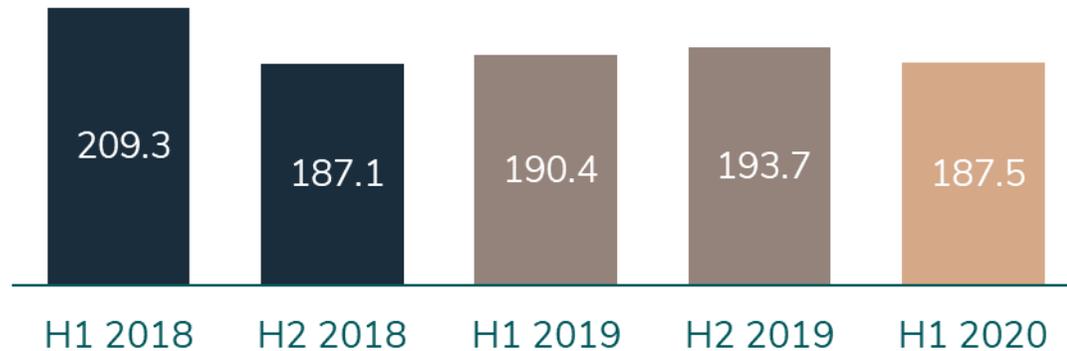

- Market dislocations in March resulted in a breach of the underlying correlations and caused ineffectiveness of the hedge
- In Q1 the closing of the positions resulted in a realised loss of €21.9m and in Q2 the decline in dividend expectations in the market and hedging of our positions resulted in an additional loss of €5.5m

## The future of structured products

- We will continue offering structured products to our Private Banking clients
- We are a wealth manager with a low-risk profile; taking high risks doesn't fit us
- In the second half of 2020, we will decide on the future model for our structured products offering

# Additional cost-saving measures introduced in Q1

Operating expenses  
€ m

- As previously indicated, we expected operating expenses to rise slightly in 2020. However, due to the cost-saving measures in the past six months, we have turned this expected increase into a slight decrease
- Strategic investment programme 2016 – 2019 finalised. Ongoing expenses from 2020 onwards absorbed in regular cost base

# Loan portfolio relatively stable, impaired loans decreased

- Increase in the Private Banking mortgage portfolio, thanks to growth in demand from the target client groups
- Other loans down by 6%, mainly driven by a decrease in current accounts (in particular one large client)
- Corporate banking portfolio decreases by 23%, as the run-off continues
- Total impaired loans decrease to €187m from €234m
- Total impaired ratio improves to 2.2% from 2.7%, thanks to improved credit quality and the continued run-off of the corporate banking portfolio (impaired corporate banking loans: -38%)

# Addition to loan loss provision relatively limited

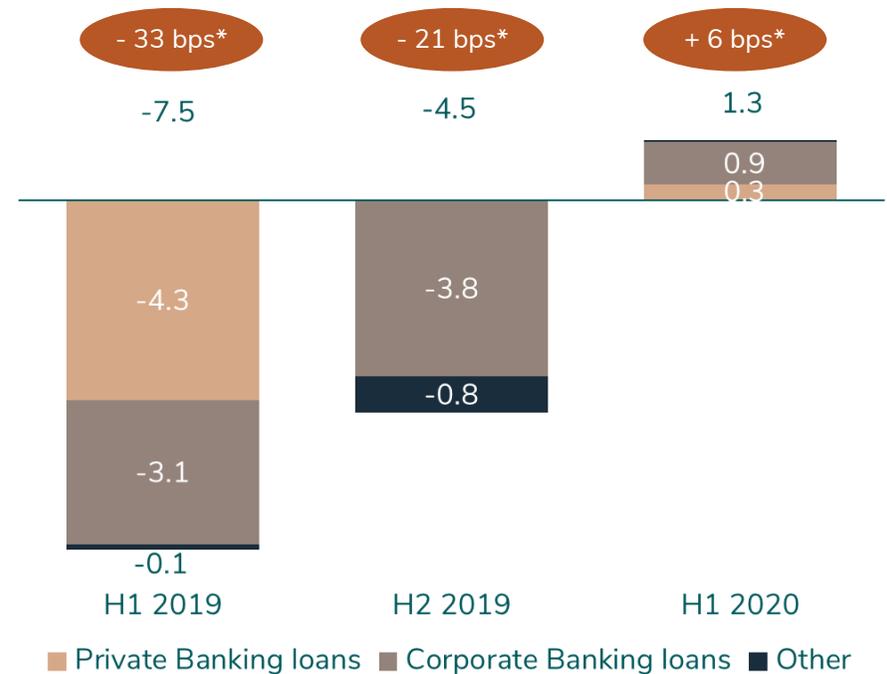

## Loan loss provision per stage

€ m	31/12/2019	30/06/2020	% change

Stage 2	5.5	5.4	-3%
Stage 3	54.6	53.9	-1%
Total	63.8	65.8	3%

- Addition to loan loss provisions at stage 1 amounts to €2.5m, driven by the economic outlook including a sharp recession during 2020
- At stage 2, the effect of the economic outlook is offset by a lower nominal value
- Level of loan loss provisions at stage 3 stable
- Very limited exposure to corona-impacted sectors such as leisure, travel, retail and energy

- Payment will not be earlier than January 2021

## **Optimisation of our capital base**

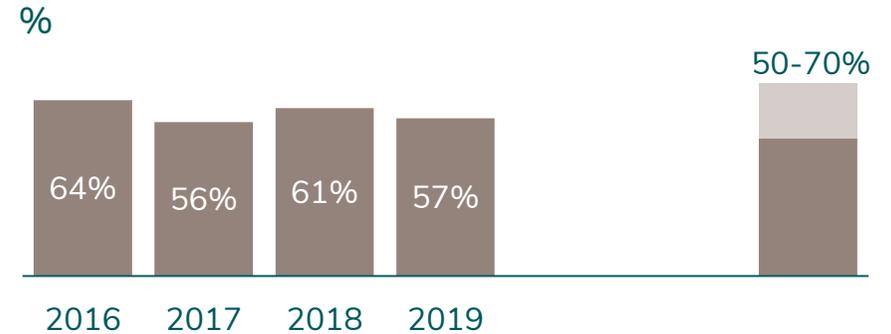

- In the future, we will continue to optimise our capital base while leaving room for possible acquisitions
